Subtitle: Is Establishing New Faculties of Engineering at Women's Universities the Panacea for Gender Equality?

Date/Time: March 7 (Tues) 19:00~20:30 (EST) , March 8 (Wed) 9:00 ~10:30 (JST)

Organizer: International Women's Year Liaison Group (IWYLG),
JAWW (Japan Women's Watch),
The National Women's Committee of the United Nations NGOs
The Permanent Mission of Japan to the United Nations

Purpose and Outline:

In the digital age, one's contribution to society can be assessed by intellectual capacity. Japanese women had some access to higher education under a sex-segregated education system. Even after 1946, when the system was integrated, very few women received tertiary education. The ratification of CEDAW in 1985 opened some choices for women to become scientists, engineers and researchers, but traditional social norms on women persisted in the workplace and at home. Recently, in Japan, women's universities are establishing faculty of engineering and increasing the number of female professors and students in the field. We acknowledge that it is essential in the digital age that more women actively participate as scientists, engineers and innovators. To innovate and transform the existing system, not only should there be a critical mass of minorities, but society as a whole shall have to alter itself to transcend the present norm.

Moderator: Dr. Masako KAMIYA/Professor of Law, Gakushuin University
